📑 CERTIFICATES

- Using Python to Access Web Data ⬈
- Analyzing and Visualizing Data with Microsoft Power BI ⬈
- Data Warehouse with Microsoft Fabric ⬈
- Implementation of Augmented Retrieval Generation (RAG) with Azure OpenAI Service ⬈
- Microsoft Certified: Azure Ai Services in Container ⬈
- Pipeline Data Factory in Microsoft Fabric ⬈
- Getting Started with Azure DevOps Boards ⬈

📇 PROFILE

Driven by a passion for Artificial Intelligence (AI) and Computer Science, I am dedicated to pushing the boundaries of technology. Pursuing my MST at FSTT, I have immersed myself in diverse projects encompassing machine learning, natural language processing, and software development.Also as an active member of ENACTUS, I collaborate on innovative solutions, leveraging my curiosity and commitment to lifelong learning to stay abreast of the latest advancements in AI and computer science.

🎓 EDUCATION

Baccalaureate
Abi El Abas Sebti
09/2019 – 06/2020 | Tangier, Morocco

Diploma of scientific and technical university studies
Faculty of Science and Technology of Tangier
09/2020 – 06/2022 | Tangier, Morocco

Licence in Computer engineering
Faculty of Science and Technology of Tangier
09/2022 – 06/2023 | Tangier, Morocco
C++/ Java/ Sgbd/ Html/ Css/ Js/ MERN/ MEAN/ Cisco /UML

MST: Artificial Intelligence and Data Sciences
Faculty of Science and Technology of Tangier
09/2023 – present | Tangier, Morocco
Python / ML/ DL / Neural Network/ Svelte/ Django/ BigData/ Kafka/ IOT/ NLP/ Data Mining/ BI

📁 PROJECTS

FSTT Chatbot
04/2024 – 06/2024
Developing a chatbot fine-tuned on a custom context based on French language models: case of study FSTT. using llama3, Docker, LORA, Rag, FineTunning, Svelte.

Twitter Sentiment Analysis
04/2024 – 06/2024
Develloping a web application that allows users to analyze the sentiment of tweets in real-time. The application uses the Twitter Data to fetch tweets and then uses a machine learning model to predict the sentiment of the tweets. The application is built using django, Kafka, and Docker.

💼 PROFESSIONAL EXPERIENCE

End of study internship
Equatorial Coca-Cola Bottling Company
04/2023 – 06/2023 | Tangier, Morocco
Developed a Logistic Optimization Website using MERN Stack: Created admin and user applications with JWT authentication and Cloudinary integration to minimize time loss in city logistics.

- Computer Vision

- Big Data & Distributed computing

- Organization

- Programming Skills

- Collaborating

Observing internship

Te Connectivity

08/2022 – 09/2022 | Tangier, Morocco

Developed Robotic Movements Using Arduino/Raspberry Pi: Implemented motor control and sensor integration for precise and efficient robotic motion. Utilized motor drivers and managed power systems for reliable operation.
